Aims and Scope

The aim of the Asian Pacific Organization for Cancer Prevention and Control is to promote an increased awareness in all areas of cancer prevention/control and to stimulate research and practical intervention approaches. Its official journal, the APJCP, is indexed on PubMed and Science Citation Index Expanded. The scope is wide-ranging, including descriptive, analytical and molecular epidemiology, experimental and clinical histopathology/biology of preneoplasias and early neoplasias, assessment of risk and beneficial factors, experimental and clinical trials of primary preventive measures/agents, screening approaches and secondary prevention, clinical epidemiology and all aspects of cancer prevention education. All of the papers published are freely available as pdf files downloadable from www.apocp.org or obtainable from the first authors.

WELCOME SPEECHES

The 5th APOCP General Assembly Conference *‘Bridging Continents for Cancer Control’*

Dear Colleagues,

The Asian Pacific Organization for Cancer Prevention (APOCP) is engaged in cancer control especially in the Asia-Pacific region, where we encounter more than 60% of all cancer cases. As Director of the Cancer Control Department of the Ministry of Health of Turkey, it is my pleasure to welcome you as President of the present APOCP 5th General Assembly Conference in the Lutfi Kırdar International Convention & Exhibition Centre in Istanbul on April 3-7, 2010. This first week of April is also “the National Cancer Week” in Turkey, and this coincidence offers a great opportunity for activities aiming at raising cancer awareness.

While highlighting the issue of cancer, we will also bring forward the city of Istanbul by means of its history, and the issues of arts and sports by means of people’s living spaces. Above all, we aim to unite all the world’s countries in Istanbul in a single body against cancer. I hope you will enjoy being in Istanbul, where the continents meet through the magnificent Bosphorus.

Prof. A. Murat Tuncer M.D., President, APOCP

Dear Colleagues,

On behalf of the members of the APOCP, I would like to express our gratitude to Dr. Murat Tuncer, President of the APOCP, Dr. Nejat Ozgul, Congress Secretary of the 5th APOCP General Assembly Conference, and the local organizing committee members for their great efforts in preparing the General Assembly Conference. The main theme “Bridging Continents for Cancer Control” is very timely and I believe that this 5th GA Conference will be a key to successful continuation of our APOCP activities by facilitating international cooperation in the global campaign against cancer.

One of the important activities of the APOCP is publishing the APJCP maintained by the efforts of the Chief/Managing Editor, Malcolm Moore. I hope that the APJCP will continue to

function to disseminate and exchange information of mutual interest on cancer epidemiology and the other areas of prevention in the Asian Pacific and the world. The future success of the APOCP/ APJCP will depend on your collaboration and positive achievements. The Asia Regional Office of the International Union Against Cancer (UICC-ARO) has also now been established to work together with the APOCP supported in part by the UICC in Geneva and the UICC Japanese National Committee.

Now the APOCP is 10 years old we hope that it will increasingly contribute as a locomotive for implementation of practical prevention programs in the Asian Pacific region.

Prof. Keun-Young Yoo M.D., Secretary-General, APOCP
